INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE

JUNE 30

2023

The interim management report of fund performance is an analysis and explanation that is designed to complement and supplement an investment fund's financial statements. This report contains financial highlights but does not contain the complete interim financial statements of the investment fund. You can get a copy of the interim financial statements at your request, and at no cost, by calling 1-888-362-7172, by visiting our website at www.ninepoint.com or SEDAR at www.sedar.com or by writing to us at: Ninepoint Partners LP, Royal Bank Plaza, South Tower, 200 Bay Street, Suite 2700, P.O. Box 27, Toronto, Ontario M5J 2J1. Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure.

Management Discussion of Fund Performance

Investment Objective and Strategies

The investment objective of Ninepoint Risk Advantaged U.S. Equity Index (the "Fund") is to obtain exposure to the performance of the S&P 500 Index, or a successor or replacement index (the "Index") and through the use of option strategies, seek to moderate the volatility of that performance.

To achieve the Fund's investment objective, the Portfolio Manager gains exposure to equities through investment in one or more exchange-traded funds ("ETFs") that seek to replicate the performance net of expenses of the Index.

The Fund may also:

- · invest in cash or short-term debt securities primarily for cash management;
- engage in securities lending and, upon providing 60 days' notice to investors, repurchase and reverse repurchase transactions as permitted by securities regulations; and
- use derivative instruments, such as options, futures, forward contracts and swaps, for both hedging and non-hedging strategies.

Risk

The risks of investing in the Fund are described in the Fund's simplified prospectus. The Fund is suitable for those investors seeking long-term capital growth from exposure to U.S. equities and some downside protection through the use of option strategies and tactical changes to the amount of equity exposure The Fund is suitable for investors with a low to medium tolerance for risk and volatility and a long-term investment horizon.

Results of Operations

The Fund, Series A returned 6.3% in the first half of 2023, while its benchmark, the S&P 500 Index, returned 14.4%.

In 2023 thus far, equities initially rallied on improving inflation trends and then experienced a sharp sell-off in March as uncertainty over the solvency of regional banks in the United States. This uncertainty drove higher demand for hedging given perceived downside risks to markets and subsequently higher expected volatility being priced into options markets. As concerns over banking risks abated, equity markets rallied, and implied volatility declined. Since March, the breadth of equity market returns have narrowed with technology driving a significant amount of equity market returns. Nascent signs that earnings trends might be improving and excitement over the potential for AI have been key contributors to technology share performance.

The Fund deployed put-spread collars that offered the strategy equity upside participation until the call strike prices and downside protection between the put spread strikes of the portfolio laddered over the forward 12 months.

The rally in US equities and an increase in the S&P 500 contributed to performance. S&P 500 long put options were the top detractor causing the lag relative to the index. The portfolio rolled expiring put spread collars into 2024. This was done to maintain portfolio hedges between the put spread strike prices and upside participation until the call strike prices on the S&P 500 ETF (SPY) underlying.

The Fund's net asset value decreased by 3.0% during the period, from \$51.3 million as at December 31, 2022 to \$49.8 million as at June 30, 2023. This change was predominantly due to net redemptions of \$4.7 million, and net realized and unrealized gains on investments and derivatives of \$3.4 million.

Recent Developments

There were no material changes to the investment strategy and features of the Fund during the period ended June 30, 2023. The Manager actively monitors the positioning of the Fund's portfolio for changes in current market conditions and the economic environment.

¹ This information is provided as at June 30, 2023 and December 31 for the years prior to 2023.

² Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of the daily average net asset value during the period. The Manager may waive or absorb a portion of the operating expenses of the Fund. Waivers and absorption can be terminated at any time.

The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. The TER includes dividend expense and securities borrowing expense paid by the Fund in connection with securities sold short.

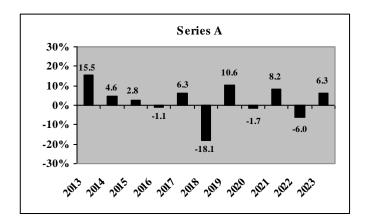

The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund.

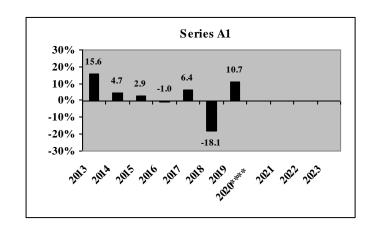

Past Performance

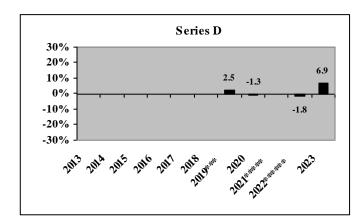

The indicated rates of return are the historical total returns including changes in share values and assume reinvestment of all distributions in additional units of the relevant Series of the Fund. These returns do not take into account sales, redemption, distribution or optional charges or income taxes payable by any shareholder that may reduce returns. Please note that past performance is not indicative of future performance. All rates of return are calculated based on the Net Asset Value of the particular Series of the Fund.

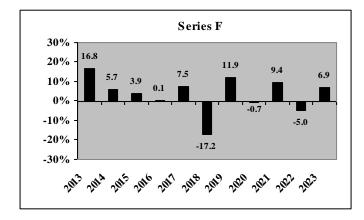

Year-by-Year Returns

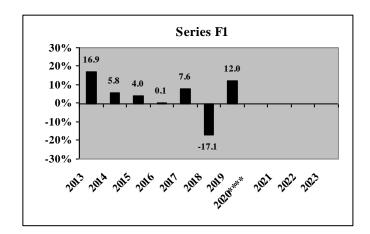

The following chart indicates the performance of each Series of the Fund for the period ended June 30, 2023 and each of the previous years ended December 31 shown, unless otherwise indicated. The chart shows, in percentage terms, how much an investment made on the first day of each period would have grown or decreased by the last day of each period. Returns are not shown for a Series in any period in which there were zero outstanding units as at the end of the period.
